

Schematic presentation of the NoPig inspection. The **NoPig inspection tool** contains 2 modules: **SA** = Sensor Array and **DCM** = Data Collector Module. The pictures on the right show: **(on the top)** the NoPig Team during inspection; **(in the middle)** cable connection to the pipeline in a dig hole, and **(at the bottom)** cable connection to the pipeline in a CP-Post. The Right Of Way (ROW) over the pipeline must be accessible for putting the NoPig tool and be free from any obstacles.
